

PV Module Warranty Insurance

Buying PV modules from an unknown manufacturer doesn't need to be risky or complicated.

Our third-party insurance provider protects your investment if a manufacturer becomes insolvent. They have performed technical and risk due diligence on many of the Anza platform vendors to ensure their strict quality standards are met. If a manufacturer becomes insolvent during the life of your project, they'll uphold the manufacturers' warranties.

Insurer:

- AA- S&P rated international insurance company
- 140+ years of risk expertise
- Over 800 insured renewable projects and more than 41 GW in 88 countries
- Provides comprehensive due diligence for every insured manufacturer

Protects you:

- Insolvency of PV module manufacturer
- Technical underperformance of panels
- PV module defects as a result of faulty manufacturing, material defects, or excessive material aging

Coverage options:

- **Time period:** Based on the product and performance warranty provided by the manufacturer, up to 30 years
- **Limits:** Options include 10, 20, 40, and 80 percent of the PV module sales price. This is the maximum payout for all PV module warranty claims in case of the manufacturer's insolvency across a warranty timeframe.

Benefits include:

- Improved bankability of PV modules for better financing conditions
- Technical and insolvency risk reduction for developers and investors
- Assured quality and long-term performance due to technical due diligence
- Long-term investment security
